## MATCHING ACCESSORIES

Hurford's can supply matching accessories; Aluminium Trims, MDF Wrapped Scotia's and Floating Floor Underlay

everWALK - 2mm closed cell underlay with attached moisture protection.

hushWALK - 2mm ultra high density premium underlay with attached moisture protection.

*OneTrim is a collection of radiata pine, white pre-primed, kiln dried, finger jointed mouldings. We offer an extensive selection from contemporary to traditional profiles that add distinctive features, dimension, texture and architectural interests to your home, retail or commercial interior.*

*To view the full collection of OneTrims moulding profiles and size options, please visit [www.onetrim.com.au](http://www.onetrim.com.au)*

# CARING FOR YOUR FLOORS

Here we offer a few tips on caring for your engineered floor. Our installation guides offer detailed maintenance recommendations for each range, as well as repair instructions and solutions to remove stains.

**Use doormats outside each entrance to your home to prevent dirt,** sand, grit and other substances from being tracked onto your floor. Use non-staining mats on your floor. Do not put rubber-backed, latex-backed or coco fibre mats on your floor because they could stain or damage the surface.

**Close your curtains or blinds where extreme sunlight hits the floor.**

A combination of heat and sunlight causes most home furnishings to fade or discolour and will do the same to your floor.

**High heels and shoes with gravel and grit stuck on them can damage any floor.** We suggest using rugs and runners in high traffic areas. Remember to shake out rugs and vacuum regularly. Your furry friends can also scratch your floors, so be sure to have your dogs and cats toenails clipped.

**Changes in humidity can cause floors to move,** cup, crown or peak because of expansion and contraction created by extreme wet or dry conditions. Protect your floor by controlling the room temperature with a heating or cooling system. Suggested temperatures of 18-25°C with relative humidity levels between 30% – 70%.

**Support furniture with wide-bearing, non-staining floor protectors.** Ideally, the protectors should be at least 25mm (or 2.5cm) in diameter, made of non-pigmented hard plastic, and rest flat on the floor. Non-staining felt protectors are also acceptable. Casters (type W), felt pads or floor protectors are recommended for all moveable furniture. Use protection mats under chairs with casters in order to avoid abrasion.

**If you need to move heavy furniture and/or appliances across the floor,** always use strips of wood or hardboard runways to protect the floor. Always use runways, even if you have an appliance dolly or even if the heavy objects are equipped with wheels or rollers.

**Sweep or vacuum your flooring regularly** (refer to the maintenance section of the installation guide on recommended cleaning techniques and products). Prevent stains by wiping up spills promptly.

**Damp mop only** but avoid excessive amounts of water. Steam mops must not be used. If a spill occurs, soak up the bulk liquid promptly. Never use oil, soap, wax or other household products to clean your floor.

## Warranties

Hurford's and quality go hand-in-hand. We're all about style, texture and the colour palette but quality is also paramount in our products. All of our engineered floorings come with a 25 year construction warranty and 15 year surface warranty.

It's important to remember, timber is a natural product with its own story. Individual boards will vary in colour, tone and features.

This variation is what gives timber flooring its natural beauty and appeal.
