COMPLETE PROFILE RANGE

Porta is a proudly Australian-owned and locally operated company with an extensive heritage spanning over 70 years. We take great pride in our legacy of manufacturing and distributing a wide range of timber products, meticulously crafted from various certified local and imported timber species.

Our core competency at Porta lies in leveraging our expertise in timber to source, mill, and create innovative and distinctive designs suitable for a wide range of internal and external applications. We are dedicated to delivering top-quality timber, moulding, and design solutions to the construction industry, making us a trusted name in the field.

Porta is dedicated to sourcing timber from sustainable and environmentally responsible forests, holding Chain of Custody under internationally recognised and accredited organisations.

Timber is a natural material with colour variations and features within the same species. It is important these natural characteristics are considered when creating design applications. The images featured in this brochure are indicative only and may vary from the actual colour of the timber.

We've taken every precaution to provide accurate information in this brochure, but please note that we may modify or discontinue products as part of our ongoing product development. For the most up-to-date information, including product availability, claims, and pricing, please confirm at the time of purchase.

DISCOVER YOUR PRODUCT

Unlock product codes

DAR - 2012 ■ ■ ■

You can locate the product code within this brochure.

The letters correspond to the profile name code.

For example, this product is Dressed All Round (DAR).

The number represents the profile size.

The first two or three numbers always correspond to the profile HEIGHT (e.g. 20mm). The last two numbers always correspond to the profile WIDTH (e.g. 12mm).

DAR - 2012 ■ ■ ■

Coloured squares show the available timber species.

For example, this product is available in Tasmanian Oak, Eucalyptus Grandis, and Clear Pine.

PORTA TIMBER SPECIES

	Tasmanian Oak	Eucalyptus Grandis	Meranti	American Oak
				
Key features	<p>A blend of Eucalyptus species, Tasmanian Oak ranges from straw to reddish-brown, with hints of cream and pink. It boasts a uniform, smooth texture and a straight, even grain.</p>	<p>Showcasing soft pinks and peach tones, it reveals unique character with insect trails and pinholes. The grain is predominantly straight and uniform.</p>	<p>A light red hardwood suitable for painting or staining. Variations in colour may occur due to multiple species sold as Meranti.</p>	<p>American Oak is light in colour, ranging from straw tones to mottled mid-brown. Its grain is typically straight, marked by distinctive growth rings.</p>
Classification	Hardwood	Hardwood	Hardwood	Hardwood
Applications	Indoor Suitable for wet areas*	Indoor Suitable for wet areas	Indoor Suitable for wet areas	Indoor Suitable for wet areas
Certification				

*Installation in wet areas must comply with specified requirements according to AS 3740:2021, and NCC Vol 1 F1.7 or Vol 2 3.8.1.

Light straw-coloured softwood, knot-free and more manageable than knotty pine. It takes well to staining, painting, waxing, or colour washing.

This Pine is graded as Standard and Better, allowing for knots and resin pockets. It can be painted, stained, colour washed, waxed, or left in its raw state.

This species has pale sapwood, contrasting with reddish-brown heartwood marked by prominent growth rings and a fine, straight grain.

Porta Primed Finger-Jointed Pine offers a cost-effective, ready-to-paint real timber substrate, made from Clear Pine with enhanced strength and stability.

This Finger-Jointed Clear Pine product is fortified with H3 LOSP treatment for termite and fungal resistance and comes pre coated with a green, water-based primer.
